

Local Fitness Club – ‘Jupiter Fitness’ to Help Unemployed

Jupiter Fitness Center has announced that it will try to help any member of the gym that has been laid off due to the bad economy.

Dan Amero, Owner/Manager, stated that he would try and reach out to unemployed members of the gym and the community, to reduce fees associated with joining the gym or to help members with their monthly dues payments. “This economy has effected everyone and people are finding it difficult dealing with unemployment, job loss, or a reduction in hours they work. I will reduce the initiation fees to ZERO and cut the membership dues in half for as long as someone is collection unemployment.”

“This is the least we can do to help our community. I feel terrible for anyone who has been hurt by this slowdown but I know that when things get stressful, there’s no place better to work out the frustrations than in the gym. People should be joining the gym because a down economy shouldn’t *weigh you down*.”

“In my 29 years of being involved with fitness, I have never seen anything like this”, Dan said. “There have been slowdowns before, but never like this. The good news is, when we come out of this recession we will be stronger and smarter and have learned to appreciate the blessings we do have in life. I hope that we will be in better shape both physically and mentally as well. The economy may be in bad shape but you don’t have to be!”

Anyone interested in taking advantage of this offer is being asked to bring in a copy of his or her unemployment letter. This membership will continue for the entire length of the unemployment compensation period.
